

OMNICHAT / THE BIANCA-FIRST WORKFLOW

Every email becomes a clear next move.

A visual proposal for monitoring, classifying and routing Omni-Strat email - with named human review before consequential sends.

WORKING DECISION MAP / 21 OCTOBER 2026

THE OPERATING IDEA

From inbox signal to owned action.

Bianca's mailbox is the first monitored source. Every proposed route holds the final external step for a named staff member.

01

MONITOR

Watch incoming email, attachments, replies and case history.

02

DETECT

Jev classifies intent and checks for conditions or missing data.

03

TRIGGER

Create the case, prepare the right message or task, and start its clock.

04

VERIFY

Staff check recipient, evidence and wording before a send or decision.

SEVEN WORKSTREAMS

Quotes / New business / Servicing / Section 14 / Medical / Campaigns / Exceptions

Quotes

An incoming request becomes a timed, owned quotation case.

DETECT

Broker email, attachments, requested cover, client details, competitor quote and discount request.

TRIGGER 01

Quote details missing

Broker request lacks the cover, client or product details needed to quote.

PREPARE / SEND

Draft “Missing Information Request” to broker; queue a call for urgent cases.

HUMAN CHECK

Bianca confirms recipient and missing fields.

TRIGGER 02

Special or high discount

10% special quote, more than 10%, pilot pricing or competitor quote detected.

PREPARE / SEND

Prepare discount form and OMP quote; route approval to product solutions or risk specialist.

HUMAN CHECK

Staff verifies approval before any discounted quote is sent.

TRIGGER 03

Quote is ready

Quote PDF passes staff quality check.

PREPARE / SEND

Draft “Your Proposal is Ready!” to broker; log the 4-hour clock and Thursday follow-up.

HUMAN CHECK

Bianca approves the quote email and compliance check.

CASE MEMORY

Broker, client, request, quote PDF, discount status, due time, owner; Thursday follow-up and Friday feedback update.

New business

A signed application becomes a live checklist of outstanding requirements.

DETECT

Broker application email, signed quote, application number, premium, supporting documents, Old Mutual requirements.

TRIGGER 01

Application received

Signed quote, application number and premium appear in the broker email.

PREPARE / SEND

Draft “We’ve Received Your Application!”; list missing requirements or confirm none.

HUMAN CHECK

Staff compares signed quote and system details before submission.

TRIGGER 02

Requirement outstanding

Underwriting, broker or BSC asks for further evidence.

PREPARE / SEND

Send the relevant requirement request; schedule daily chasers and a progress update.

HUMAN CHECK

Bianca approves the addressee and wording.

TRIGGER 03

Decision or issue received

Underwriting decision, issue notice or schedule arrives.

PREPARE / SEND

Prepare decision email, issue notice and schedule check sequence for broker.

HUMAN CHECK

Human checks loading, exclusion, decline and final policy schedule.

CASE MEMORY

Broker code, client, application number, cover, premium, first-year commission, each requirement and its owner.

Servicing

A service request keeps its CES number, documents and SLA together.

DETECT

Broker servicing emails, request type, product generation, signatures, BSC replies and CES reference.

TRIGGER 01

Service request received

Premium, benefit, beneficiary, cancellation or other amendment intent detected.

PREPARE / SEND

Draft receipt email; prepare signature pack or BSC-only submission; record CES reference.

HUMAN CHECK

Staff confirms request type and required documents.

TRIGGER 02

Signed pack returned

Required signatures and supporting documents have arrived.

PREPARE / SEND

Prepare BSC submission; update the case and start its SLA clock.

HUMAN CHECK

Staff verifies signatures and policy identity.

TRIGGER 03

SLA breached

BSC response is overdue against the confirmed service SLA.

PREPARE / SEND

Draft BSC escalation, escalation-tracker entry and broker progress notice.

HUMAN CHECK

Bianca approves escalation before send.

CASE MEMORY

Request type, policy, CES number, sent date, SLA, outstanding documents, BSC status and escalation owner.

Section 14

A recurring follow-up queue for long-running transfer cases.

DETECT

Open transfer tracker, provider contact, product, submitted amount, weekly replies and proof of payment.

TRIGGER 01

Weekly chase due

Open Section 14 transfer has no current provider feedback.

PREPARE / SEND

Draft weekly feedback request on the existing thread; update next chase date.

HUMAN CHECK

Bianca checks provider and case match.

TRIGGER 02

Provider replies

Transfer feedback or further requirements arrive.

PREPARE / SEND

Attach reply to case; refresh next action and owner; pause chaser if resolved.

HUMAN CHECK

Bianca checks the new status.

TRIGGER 03

Payment proof arrives

Proof of payment is received for a transfer.

PREPARE / SEND

Compare paid amount with expected amount; flag any difference.

HUMAN CHECK

Bianca confirms completion or investigates discrepancy.

CASE MEMORY

Provider, client, product, expected amount, last contact, next chase, proof and completion state.

Medical

Medical requirements move between broker, provider, doctor and underwriting.

DETECT

Underwriting requirements, Medcor appointment, doctor questionnaire, invoice, proof of payment and received results.

TRIGGER 01

Blood tests ordered

Underwriting requires medical tests.

PREPARE / SEND

Prepare Medcor requisition; send broker appointment update; track results.

HUMAN CHECK

Staff confirms client details and consent.

TRIGGER 02

Doctor questionnaire due

Doctor details or completed questionnaire are outstanding.

PREPARE / SEND

Draft doctor request and daily follow-up; route invoice to payment team.

HUMAN CHECK

Bianca checks sensitive attachments and recipient.

TRIGGER 03

Evidence arrives

Appointment, proof of payment or medical result is received.

PREPARE / SEND

Update requirement checklist; notify underwriting when the right evidence is ready.

HUMAN CHECK

Clinical decisions remain with underwriting.

CASE MEMORY

Requirement-by-requirement owner, sent/received dates, medical provider, doctor, invoice and proof status.

Campaigns

Book reports become reviewed opportunities and personalised outreach.

DETECT

Adviser book report, each client ID, policy status, opportunities, quote figures and campaign assets.

TRIGGER 01

Book report received

Adviser sends a book report with client opportunities.

PREPARE / SEND

Create one review task per client and link each to its adviser.

HUMAN CHECK

Bianca checks data quality and suitability.

TRIGGER 02

Opportunity approved

A relevant opportunity and current quote are available.

PREPARE / SEND

Prepare personalised campaign email and broker meeting task.

HUMAN CHECK

Bianca reviews every outbound campaign message.

TRIGGER 03

Application follows

Campaign reply becomes a signed application.

PREPARE / SEND

Open a new-business case and its requirements checklist.

HUMAN CHECK

Staff verifies signed quote and premium.

CASE MEMORY

Adviser, client, opportunity, quote, sent status and resulting application.

Exceptions

Unclear or sensitive messages pause in a visible review queue.

DETECT

Every classified email and attachment; confidence, case match, recipient and compliance evidence.

TRIGGER 01

Low confidence or duplicate

Intent, case match or recipient cannot be trusted.

PREPARE / SEND

Hold send; place candidates and reason in Bianca's review queue.

HUMAN CHECK

Bianca selects the case and route.

TRIGGER 02

Compliance evidence absent

Required client-signed FSCA document is missing before adviser information is shared.

PREPARE / SEND

Block adviser send and request documented human decision.

HUMAN CHECK

Bianca or Francois resolves compliance path.

TRIGGER 03

Complex proposal

Unusual wording, conflicting facts or specialist discount detected.

PREPARE / SEND

Route to Francois or specialist; capture the resolved rule for future examples.

HUMAN CHECK

Named human owns the decision.

CASE MEMORY

Original signal, proposed class, reason for hold, decision, owner, timestamp and audit trail.

THE SYSTEM

A shared operating view, starting on site.

The first month focuses on Bianca. The foundation supports later shared mailboxes and other staff without changing the case model.

01

MICROSOFT 365

Bianca's mailbox first; more mailboxes later.

02

ON-SITE WORKSPACE

Local server, staff login, case register, rules and audit trail.

03

STAFF CASE VIEW

Inbox, owner, next action, draft, evidence and approval.

JEV BY TYPESAFE

The only proposed metered AI API: classify email and evaluate routing conditions. Record confidence, decision and cost.

HUMAN CONTROL AND OLD MUTUAL

Staff approve outward messages and sensitive decisions. Browser work in Old Mutual is exploratory: test iteratively, with human review, and do not promise reliable automation in month one.

DEDICATED ON-SITE SERVER REQUIRED

Available Lenovo M70q Gen 5

Intel Core i5 14th gen / 32 GB DDR5 5600 MHz / 1 TB NVMe SSD

Windows 11 Pro / two-year vendor warranty

R18,999

including VAT

One-time hardware

FIRST-MONTH DELIVERY

One month focused on Bianca.

A reusable foundation is built while the most valuable mailbox paths are proved. Exact scope follows review of live examples and access.

WEEK 1

Connect and learn

Secure mailbox access, import sample emails, label real cases and confirm owners.

WEEK 2

Classify and queue

Monitor Bianca's mailbox, detect intent and conditions, and open owned cases.

WEEK 3

Trigger and follow up

Draft the approved next action, start clocks, and test quote and service branches.

WEEK 4

Prove and hand over

Review false routes, refine rules, validate with Bianca and prepare shared use.

PROPOSED INVESTMENT

Choose the build pace.

Developer fees are monthly and exclude VAT. The recommended pair targets Bianca's first-month foundation; a solo option narrows what fits in that month. Dedicated server hardware is a separate one-time purchase.

RECOMMENDED

Mid-level + junior — R50,000

R35,000 mid-level + R15,000 junior. Parallel build and testing.

OPTION 02

Mid-level only — R35,000

Experienced lead working alone. Fewer paths may fit in month one.

OPTION 03

Junior only — R15,000

Slower delivery and a smaller first-month scope, with greater need for guidance.

PAYMENT FOR THE RECOMMENDED MONTH

R25,000 at start

R25,000 at 30 calendar days

or 21 working days, whichever comes first

JEV USAGE ESTIMATE

The decision cost is measurable.

This is a planning scenario based on a recorded local Jev email trial and TypeSafe's published input-token rate. It is not an invoice or an accuracy promise.

PLANNING SCENARIO / MONTH

$2.30

about R37.76 at 16.4027 ZAR/USD

400 emails/day x 22 working days + 1 extra decision/email

+ 200 Section 14 assessments/week

MEASURED LOCAL TRIAL

181 eligible emails / 284 requests / 663,182 input tokens

RATE USED

$0.042 per million input tokens

FOURFOLD STRESS CASE

about $9.21 per month

EXCLUDED

Old Mutual browser steps and unmeasured future usage

The interactive HTML lets Omni-Strat change workload assumptions. Actual usage depends on email length, routing depth, retries, and model pricing at the time of use.

DIRECT VENDOR COSTS

Choose the staff assistant separately.

Omni-Strat takes out or upgrades these subscriptions directly with the vendor. The fees do not come to us. An existing suitable subscription may only need an upgrade.

CHATGPT PRO

$100 / month

Individual staff subscription, chosen and paid directly by Omni-Strat.

CLAUDE MAX 20X

$200 / month

Individual staff subscription, chosen and paid directly by Omni-Strat.

HOW THEY FIT

Staff use the shared on-site OmniChat workspace. A direct assistant subscription supports a named user and development work; it does not run automated email decisions. Jev remains the only proposed AI API charge.

Development preference

Our team leans toward Claude Code for implementation. Client subscription choice remains Omni-Strat's decision.

READY FOR WORKFLOW SIGN-OFF

What we need to begin.

Confirm the real templates, owners and access before a proposed route becomes an approved business rule.

FROM BIANCA

- Redacted sample emails and current tracker
- Case owners, quote wording and follow-up templates
- Section 14 contacts, SLAs and escalation owners

FROM FRANCOIS AND IT

- Microsoft 365 access and on-site server requirements
- Old Mutual access policy and data handling requirements
- Staff roles, sign-off route and exception owners

NEXT DECISION

Review the workflow routes and choose the developer arrangement together.

WORKING PROPOSAL - PROCESS RULES REQUIRE OMNI-STRAT APPROVAL
